The Source of Life

EVIAN

40/25

Every drop of Evian natural spring water begins as rain and snow falling high in the pristine French Alps. This water then spends at least 15 years slowly filtering through a vast, protective aquifer deep within the mountain.

The aquifer consists of glacial sand and that is what gives Evian its unique taste and mineral composition

BADOIT

40/25

As Badoit water pushes its way up from a deep water table through a 500-metre fissure in the local granite, it surfaces with a light natural sparkle and a measure of sodium bicarbonate and fluoride, having a lightening effect on even the richest meal.

SAN BENEDETTO NATURALE

26/22

SAN BENEDETTO FRIZZANTE

35/26

San Benedetto traces to the republic of Venice when it was the favorite of aristocratic Venetian families. The water, tapped at the surface in Ancient times, is now drawn from 1,000 feet below to ensure that all its original features are unchanged.

San Benedetto trickles to its source from the glaciers of the Dolomites.

AL AIN

22/16

Al Ain Water's balanced mineral composition revitalizes and nourishes your body, so you lead a healthy and purposeful lifestyle.

In addition to many health benefits, this right balance of essential minerals gives Al Ain Water a unique soft and smooth taste.
